KEEP THAT GREAT GM FEELING WITH GENUINE GM PARTS.

JOHNNY WONDER

Q. "HOW DOES A SCAB FORM?"

JASON COUCH, OF MESQUITE, TX., WINS A PRIZE FOR THIS QUESTION.

A. If you accidentally cut your finger, blood flows into the wound from tiny blood vessels in your skin. But your finger doesn't bleed for long. When blood is exposed to air, it thickens, or clots. It plugs up the cut so that you do not lose too much blood. Little by little, the clot hardens until it forms a hard crust or scab. The

scab provides a protective covering while the wound is healing. It also keeps out harmful germs that might cause infections. Under the scab, new skin tissue grows and repairs the cut. When the wound is healed, the scab falls off.

You can win a World Almanac, 12 color, 1980 edition, and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1000, (D.A.) Santa Cruz, CA 95061.
